## KITCHEN PLANNER

At Nolan Kitchens we have a straight forward '3 Step Process' for all kitchen sales enquiries. STEP 1 - Design Consultation, STEP 2 - Site Survey & Booking Deposit and STEP 3 - Manufacturing, Delivery & Installation.

We developed our kitchen planner to help you identify relevant information for STEP 1 - Design Consultation. Our designer's initial plans will be based on your measurements, so please review our measuring tips before sketching your room on the graph paper provided.

Note: We will visit your home to confirm measurements before we manufacture your new kitchen.

## ROOM MEASURING TIPS

- Measurements – Please use millimetres (for example 3 foot is roughly 900 millimetres).
- Firstly, roughly draw the shape of the room and measure the length, height and width of the room.
- Doors: measure the position and width of all internal doors (back doors, patios etc).
- Windows: measure the height & width of windows from floor to sill. Measure the distance from the edge of the window to wall on either side.
- Boiler: If your boiler is in the kitchen, identify its location on the sketch and measure its dimensions.
- Sink & Cooker: Identify where your existing sink and cooker are located.
- Take note of any pillars or bulkheads in the room.
- Radiators: Note the size and location of all radiators.
