

# Kitchen Planner

## Considering a new kitchen...

Did you know you'll probably only buy two kitchens in your lifetime, so it's important that your new kitchen includes everything to suit your changing lifestyle needs. Do you love to cook? Is space an issue? Our Kitchen Planner is designed to help you sketch out your dimensions and figure out the best use of your space.

## Getting started...

To get started we need some basic room measurements. Just sketch out the key measurements shown in the example overleaf. Once you have your basic measurements why not take a photo of your existing kitchen and bring it along or email it in.

## Let your imagination go...

Our showrooms are designed to fire up your imagination. We've combined the latest kitchen styles with possible room layouts to give you some design inspiration and to help you visualise how your new kitchen could look in your own home.

## What happens next...

Just call our showrooms to make an appointment and we'll explore all your options, working with you to design a kitchen that's just right for you.

### Your Contact Details

We just need a little bit of information so that we can keep in touch over the course of your kitchen project:

# Sketch your kitchen

## Handy tips!

- Roughly sketch out your room shape
- Measure the length and width of your room
- Don't forget to measure your windows too
- Sketch where your existing sink and cooker are
- Highlight any pillars, bulkheads etc.
- Include position and measurements of radiators/boilers too
